

Features and Specifications of Universal Bender

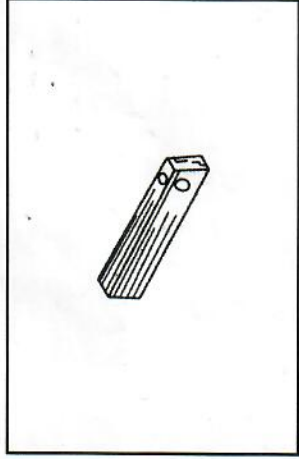

1. Main Features:

- Easy and precise operation
- Bending angle up to 120°
- Extremely high precision of bending within the bending range.
- Wide supporting face ensuring safe and reliable operation
- Bending angle of various radius by changing and/or turning around die plate
- Using bending eccentric block instead of bracket

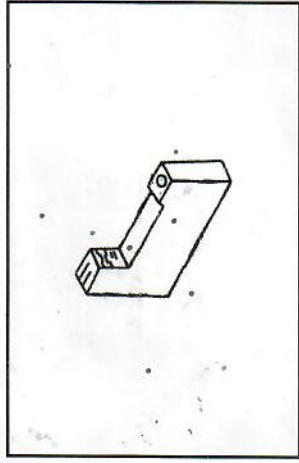

2. Specifications:

	UB-70	UB-100
Cold bending:		
flat steel	70 x 6mm	100 x 5mm
square steel	16 x 16mm	16 x 16mm
round steel	18mm	18mm
angle steel	60 x 8mm	60 x 8mm
Hot bending:		
flat steel	70 x 15mm	100 x 15mm
square steel	22 x 22mm	22 x 22mm
round steel	22mm	22mm
angle steel	70 x 15mm	100 x 12mm

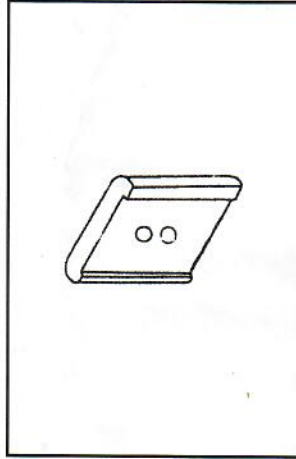

Universal Bender

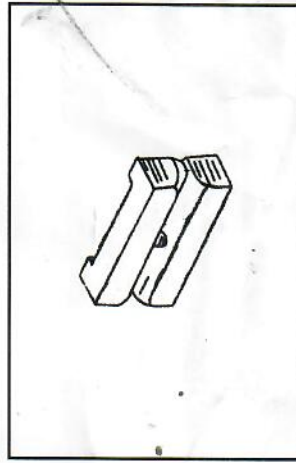

1. Limit lever

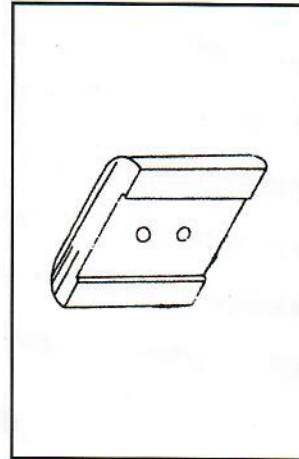

4. Bending die plate

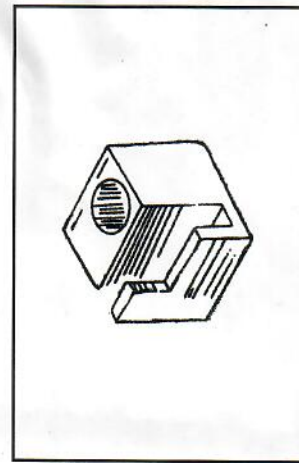

2. Die plate (fillet radius 10/15)

5. Die plate of diamond section

3. Die plate (fillet radius 20/25)

6. Bending eccentric seat
